

## Glove Relacing

### Baseball Glove Repair

Have a worn out old glove? Is it in need of some TLC? If so your worries are over. **Lance Bond** who is associated with our Pascagoula Dixie Youth Baseball League can repair your old glove. He can repair, re-lace, restring, and condition your old glove to get it back into a useable condition. Don't toss your old neglected glove in a box or place it in a garage sale, call **Lance** today for an assessment.

You could go out and buy a new glove but why? You will have to work to break it in and while it is being broken in you will have to listen to your son complain about not being able to close the glove completely in order to hang onto the ball thus causing him to make needless errors.

Our league had several old catchers' mitts that had been discarded because of broken laces or torn pockets but after Lance finished with them we are now able to place them back into circulation. Give him a call today at **228-217-3776** or send him an email at [lancebond@cableone.net](mailto:lancebond@cableone.net).
