

POST-GAME FIELD PREPARATIONS LACAMAS LITTLE LEAGUE

- 1. POST Game Prep to be completed by VISITING TEAM**
- 2. Rake or Drag infield. If there is a game after yours, the home team for the following game should help to complete this work.**
- 3. Focus on the Pitchers Mound and the Batter's Box first. These are the areas that require the most care.**
- 4. Rake and Tamp the Pitcher's Mound, being sure to fill in front of the rubber. In dry conditions, it helps to lightly water the mound before your game if time allows.**
- 5. Rake and level the Batter's Box. Tamping the area will help prevent holes, especially for the right handed batters. Watering this area helps solidify and improves the playing area.**
- 6. Remove all equipment from the field and store in garage next to the LLL office.**

**REMEMBER!!!! ALWAYS RAKE THE BASEPATHS LENGTHWISE
AND AVOID PUSHING INFIELD DIRT INTO THE GRASS!!!!**
